Vol. 34, Nos 1-12

Subjects

AIRCRAFT DESIGN AND TECHNOLOGY

Preserving aging aircraft, Jan., p. 38.
Rebuilding markets for jet fighter upgrades, Feb., p. 22.
Airlines drive new engines to the limit, March, p. 4.
Quickly-built model tests short takeoffs, April, p.18.
Civilizing military thrust vectoring flight control, April, p. 20.
The helicopter industry: About to implode?, April, p. 38.
JPATS finally takes wing, May, p. 40.
Time to take general aviation seriously, June, p. 4.
If we build it, will they come?, July, p. 3.
New materials, concepts halve composite-wing costs, August, p. 18.
Control in the cockpit: Crews vs. computers, August, p. 28.
UAVs: A bird's-eye view, Nov., p. 38.
Aerospace '96: Aerodynamic decelerators, Dec., p. 9.
Aerospace '96: Applied aerodynamics, Dec., p. 12.
Aerospace '96: Air transportation, Dec., p. 24.
Aerospace '96: Aircraft operations, Dec., p. 25.
Aerospace '96: Flight testing, Dec., p. 26.
Aerospace '96: General aviation, Dec., p. 28.
Aerospace '96: Ground testing, Dec., p. 63.
Aerospace '96: Lighter-than-air, Dec., p. 30.
Aerospace '96: V/STOL, Dec., p. 29.

AVIONICS AND ELECTRONICS

Mission Control, in living color, Jan., p. 30.
Teamwork becomes more complicated, Feb., p. 4.
Military avionics fly off the shelf, Feb., p. 28.
ATM: The only constant is change, March, p. 20.
Engineering in a virtual environment, July, p. 32.
Engineers focus on American-made flat panel displays, August, p. 20.
Control in the cockpit: Crews vs. computers, August, p. 28.
Small and smaller: The world of MNT, Sept., p. 26.
Keeping pace with electronic design automation, Oct., p. 17.
Real savings from virtual testing, Oct., p. 20.
Big benefits from tiny technologies, Oct., p. 38.
Aerospace '96: Guidance, navigation, and control, Dec., p. 20.
Aerospace '96: Digital avionics, Dec., p. 38.

COMMUNICATIONS

Russian roulette at 1,000 feet, Jan., p. 26.
ACTS' legacy: The Ka-band explosion, Feb., p. 33.
Time to reconsider automation, April, p. 4.
A global ATC system for the 21st century, June, p. 40.
Asia gears up for communications boom, August, p. 5.
Satellite services soar, Nov., p. 26.
Aerospace '96: Communications, Dec., p. 36.

COMPUTERS AND SOFTWARE

The knowledge revolution: A Working Model for the 1990s, Jan., p. 15.
Mission Control, in living color, Jan., p. 30.
Modems: Hardware for today's connectivity, Feb., p. 16.
Knowledge-based engineering: Automating the process, March, p. 14.
Hot cup of Java: Keeping companies awake, April, p. 12.
Virtual reality: Not all smoke and mirrors, May, p. 13.
Working the LAN for a rich harvest, June, p. 17.
Virtual product development: Process and technology win, July, p.18.
Engineering in a virtual environment, July, p. 32.
Keeping track of time and contacts, August, p. 15.
Data analysis: Statistics made easy, Sept., p. 17.
A hard look at soft computing, Sept., p. 34.
Real savings from virtual testing, Oct., p. 20.
The browser wars begin, Nov., p. 15.
Aerospace '96: Multidisciplinary design optimization, Dec., p. 27.
Aerospace '96: CAD/CAM, Dec., p. 62.

ECONOMICS

Opening doors when bases close, Jan., p. 33.
NASA centers shrink to survive leaner years, March, p. 34.
The helicopter industry: About to implode?, April, p. 38.
Partnership: The price of entry, June, p. 28.
Tools of the trade: Offsets, outsourcing, and joint ventures, Sept., p. 10.

ENVIRONMENT

Aircraft cooling unit smiles on environment, Jan., p. 18.
Russian roulette at 1,000 feet, Jan., p. 26.
Water systems impinge on CFC cleaning methods, May, p. 16.
More green for NASA, August, p. 34.
New markets for advanced space systems, Nov., p. 32.
Aerospace '96: Atmospheric environment, Dec., p. 14.

INSTRUMENTATION AND TECHNOLOGY

Incredible shrinking spacecraft, Jan., p. 20.
Aircraft cooling unit smiles on environment, Jan., p. 18.
Dot-size systems perform actuating and sensing tasks, Feb., p. 20.
Infrared camera detects aircraft icing conditions, March, p. 18.
Civilizing military thrust vectoring flight control, April, p. 20.
New ideas for affordable space missions, April, p. 26.
Water systems impinge on CFC cleaning methods, May, p. 16.
XTE: Astronomy with autonomy, June, p. 34.
A global ATC system for the 21st century, June, p. 40.
Electric acuators challenge hydraulics, July, p. 21.
Engineers focus on American-made flat panel displays, August, p. 20.
MightySat: A small but capable bus, Sept., p. 20.
Small and smaller: The world of MNT, Sept., p. 26.
The changing face of ion beaming, Oct., p. 24.
Big benefits from tiny technologies, Oct., p. 38.
Aerospace '96: Aerodynamic measurement technology, Dec., p. 10.
Aerospace '96: Fluid dynamics, Dec., p. 16.
Aerospace '96: Aerospace maintenance, Dec., p. 34.
Aerospace '96: Sensor systems, Dec., p. 40.
Aerospace '96: Survivability, Dec., p. 68.

INTERNATIONAL

New players enter 100-seat jet competition, Jan., p. 4.
Teamwork becomes more complicated, Feb., p. 4.
After its maiden flight, FSX fights budget battle, Feb., p. 6.
Foreign affairs grab national attention, Feb., p. 10.
Airlines drive new engines to the limit, March, p. 4.
Time to reconsider automation, April, p. 4.
Why invest in Russia?, April, p. 3.
Time to take general aviation seriously, June, p. 4.
NASDA changes course, pursues R&D, June, p. 6.
Partnership: The price of entry, June, p. 28.
The wrong time for larger aircraft?, July, p. 9.
Space budgets hold their own against budget constraints, July, p. 4.
Radical changes sweep France, August, p. 4.
Asia gears up for communications boom, August, p. 5.
Mapping the cultural divide, Sept., p. 4.
Firms, regulators face globalization obstacles, Oct., p. 4.
Korea looks to the skies for economic growth, Oct., p. 6.
Japan plans day trips to space, Nov., p. 4.
Upgrading H-2's prospects, Nov., p. 5.

LIFE SCIENCES

Bringing life sciences to life, March, p. 28.
Aerospace '96: Life sciences, Dec., p. 52.

MANAGEMENT

Closely watched planes...and possible mergers, Jan., p. 8.
New ideas for affordable space missions, April, p. 26.
FAA acquisition reform: The road ahead, April, p. 32.
The Air Force and industry think lean, May, p. 32.
Mapping the cultural divide, Sept., p. 4.
A not-so-hidden cost of doing business, Oct., p. 3.
Aerospace '96: Systems engineering, Dec., p. 32.
Aerospace '96: System effectiveness and safety, Dec., p. 35.

MATERIALS AND STRUCTURES

Taking the e-beam cure, July, p. 23.
New materials, concepts halve composite-wing costs, August, p. 18.
Breaking the turbine temperature barrier with TBCs, Oct., p. 22.
The changing face of ion beaming, Oct., p. 24.
Aerospace '96: Materials, Dec., p. 64.
Aerospace '96: Structural dynamics, Dec., p. 65.
Aerospace '96: Structures, Dec., p. 66.

MILITARY SYSTEMS

Rebuilding markets for jet fighter upgrades, Feb., p. 22.
Military avionics fly off the shelf, Feb., p. 28.
JPATS finally takes wing, May, p. 40.
Putting THAAD to the test, June, p. 24.
New materials, concepts halve composite-wing costs, August, p. 18.
Change in the wind for FAA?, Sept., p. 3.
A new theater for military space players, Sept., p. 40.
Aerospace '96: Missile systems, Dec., p. 54.
Aerospace '96: Weapon system effectiveness, Dec., p. 57.

MISSILES

Mergers (again!), missiles, and more, March, p. 7.
Putting THAAD to the test, June, p. 24.
Aerospace '96: Missile systems, Dec., p. 54.

POLICY

Toward a consolidated plan for space, Jan., p. 3.
Closely watched planes...and possible mergers, Jan., p. 8.
The DOD single-process initiative, Feb., p. 3.
Foreign affairs grab national attention, Feb., p. 10.
Mergers (again!), missiles, and more, March, p. 7.
Save the world? Sorry, too expensive!, March, p. 3.
FAA acquisition reform: The road ahead, April, p. 32.
Politics, smoke..and fire, April, p. 8.
Defense dollars and election year politics, May, p. 7.
Leaning toward a stronger America, May, p. 3.
Speculating on safety, secretaries, and changes of station, June, p. 10.
Keep the U.S. launch business competitive, June, p. 3.
FAA and the Navy face turmoil; the Air Force welcomes Germany, July, p. 12.
If we build it, will they come?, July, p. 3.
EELV: New acquisition strategy for a new launcher, July, p. 38.
Showing Earth due diligence, August, p. 3.
Changes afoot at NASA, the FAA, and the Pentagon, August, p. 9.
Acquisition reform: Government and industry speak out, August, p. 40.
Coping with loss, challenge, and change, Sept., p. 7.
Tools of the trade: Offsets, outsourcing, and joint ventures, Sept., p. 10.
Firms, regulators face globalization obstacles, Oct., p. 4.
At home and abroad, admirals make the news, Oct., p.10.
DARPA turns to "other transactions", Oct., p. 33.
Campaign '96: Where they stand, Oct., p. 13.
Conflict abroad and at home, Nov., p. 9.
The rocky road to space-launch heaven, Nov., p.20.
Perceptions and realities in engineering education, Nov., p. 3.
Smaller, faster, cheaper...better?, Dec., p. 3.

PROPULSION AND POWER

A winning combination for tomorrow's spaceliners, Feb., p. 38.
Airlines drive new engines to the limit, March, p. 4.
Aerospike engine powers RLV savings, Nov., p. 18.
Aerospace '96: Aerospace power, Dec., p. 42.
Aerospace '96: Air breathing propulsion, Dec., p. 44.
Aerospace '96: Electric propulsion, Dec., p. 43.
Aerospace '96: Hybrid rockets, Dec., p. 46.
Aerospace '96: Liquid propulsion, Dec., p. 47.
Aerospace '96: Nuclear and future flight propulsion, Dec., p. 48.
Aerospace '96: Propellants and combustion, Dec., p. 49.
Aerospace '96: Solid rockets, Dec., p. 51.
Aerospace '96: Terrestrial energy, Dec., p. 50.
Aerospace '96: Thermophysics, Dec., p. 22.

ROBOTICS

Aerospace '96: Space automation and robotics, Dec., p. 56.

SPACE AND ATMOSPHERIC SCIENCE

Jupiter's first 100 miles, April, p. 22.
New ideas for affordable space missions, April, p. 26.
Reaching for the red planet, May, p. 22.
Hubble's new view of the Cosmos, May, p. 20.
XTE: Astronomy with autonomy, June, p. 34.
NEARing Eros for less, June, p. 20.
Assessing the threat from comets and asteroids, August, p. 24.
New markets for advanced space systems, Nov., p. 32.
Aerospace '96: Astrodynamics, Dec., p. 11.
Aerospace '96: Atmospheric flight mechanics, Dec., p. 15.
Aerospace '96: Balloons, Dec., p. 18.
Aerospace '96: Plasmadynamics and lasers, Dec., p. 19.
Aerospace '96: Space operations and support, Dec., p. 53.
Aerospace '96: Space processing, Dec., p. 58.
Aerospace '96: Space systems, Dec., p. 60.

SPACE TRANSPORTATION

A winning combination for tomorrow's spaceliners, Feb., p. 38.
EELV: New acquisition strategy for a new launcher, July, p. 38.
Aerospace '96: Space transportation, Dec., p. 59.

SPACECRAFT

Incredible shrinking spacecraft, Jan., p. 20.
ACTS' legacy: The Ka-band explosion, Feb., p. 33.
Jupiter's first 100 miles, April, p. 22.
Hubble's new view of the Cosmos, May, p. 20.
XTE: Astronomy with autonomy, June, p. 34.
NEARing Eros for less, June, p. 20.
MightySat: A small but capable bus, Sept., p. 20.
A hard look at soft computing, Sept., p. 34.
Engineering the space station, Oct., p. 26.
Japan plans day trips to space, Nov., p. 4.
Upgrading H-2's prospects, Nov., p. 5.

CONVERSATIONS

with Norman Thagard, Jan., p. 12.
with Curt Weldon, Feb., p. 13.
with Robert V. Davis, March, p. 10.
with Richard Hallion, April, p. 15.
with William Wagner, May, p. 10.
with Gary Payton, June, p. 14.
with Gen. Ronald Fogleman, July, p. 15.
with John Rather, August, p. 12.
with Ian Pryke, Sept., p. 14.
with Edward Aldridge Jr., Oct., p. 14.
with David Hinson, Nov., p. 12.

VIEWPOINT

Test bans, treaties, and intelligence—and politics [correspondence], Jan., p. 7.
